

TRINITY

THE NEXT LEVEL

WHAT IS TRINITY

Trinity is a new patent pending asymmetrical 3 point mounting system for skates. The front mounting points have been shifted to the outside of the frame forming a channel for the wheels. This allows us to lower the center of gravity giving an unmatched and exciting new skate experience.

WHY TRINITY

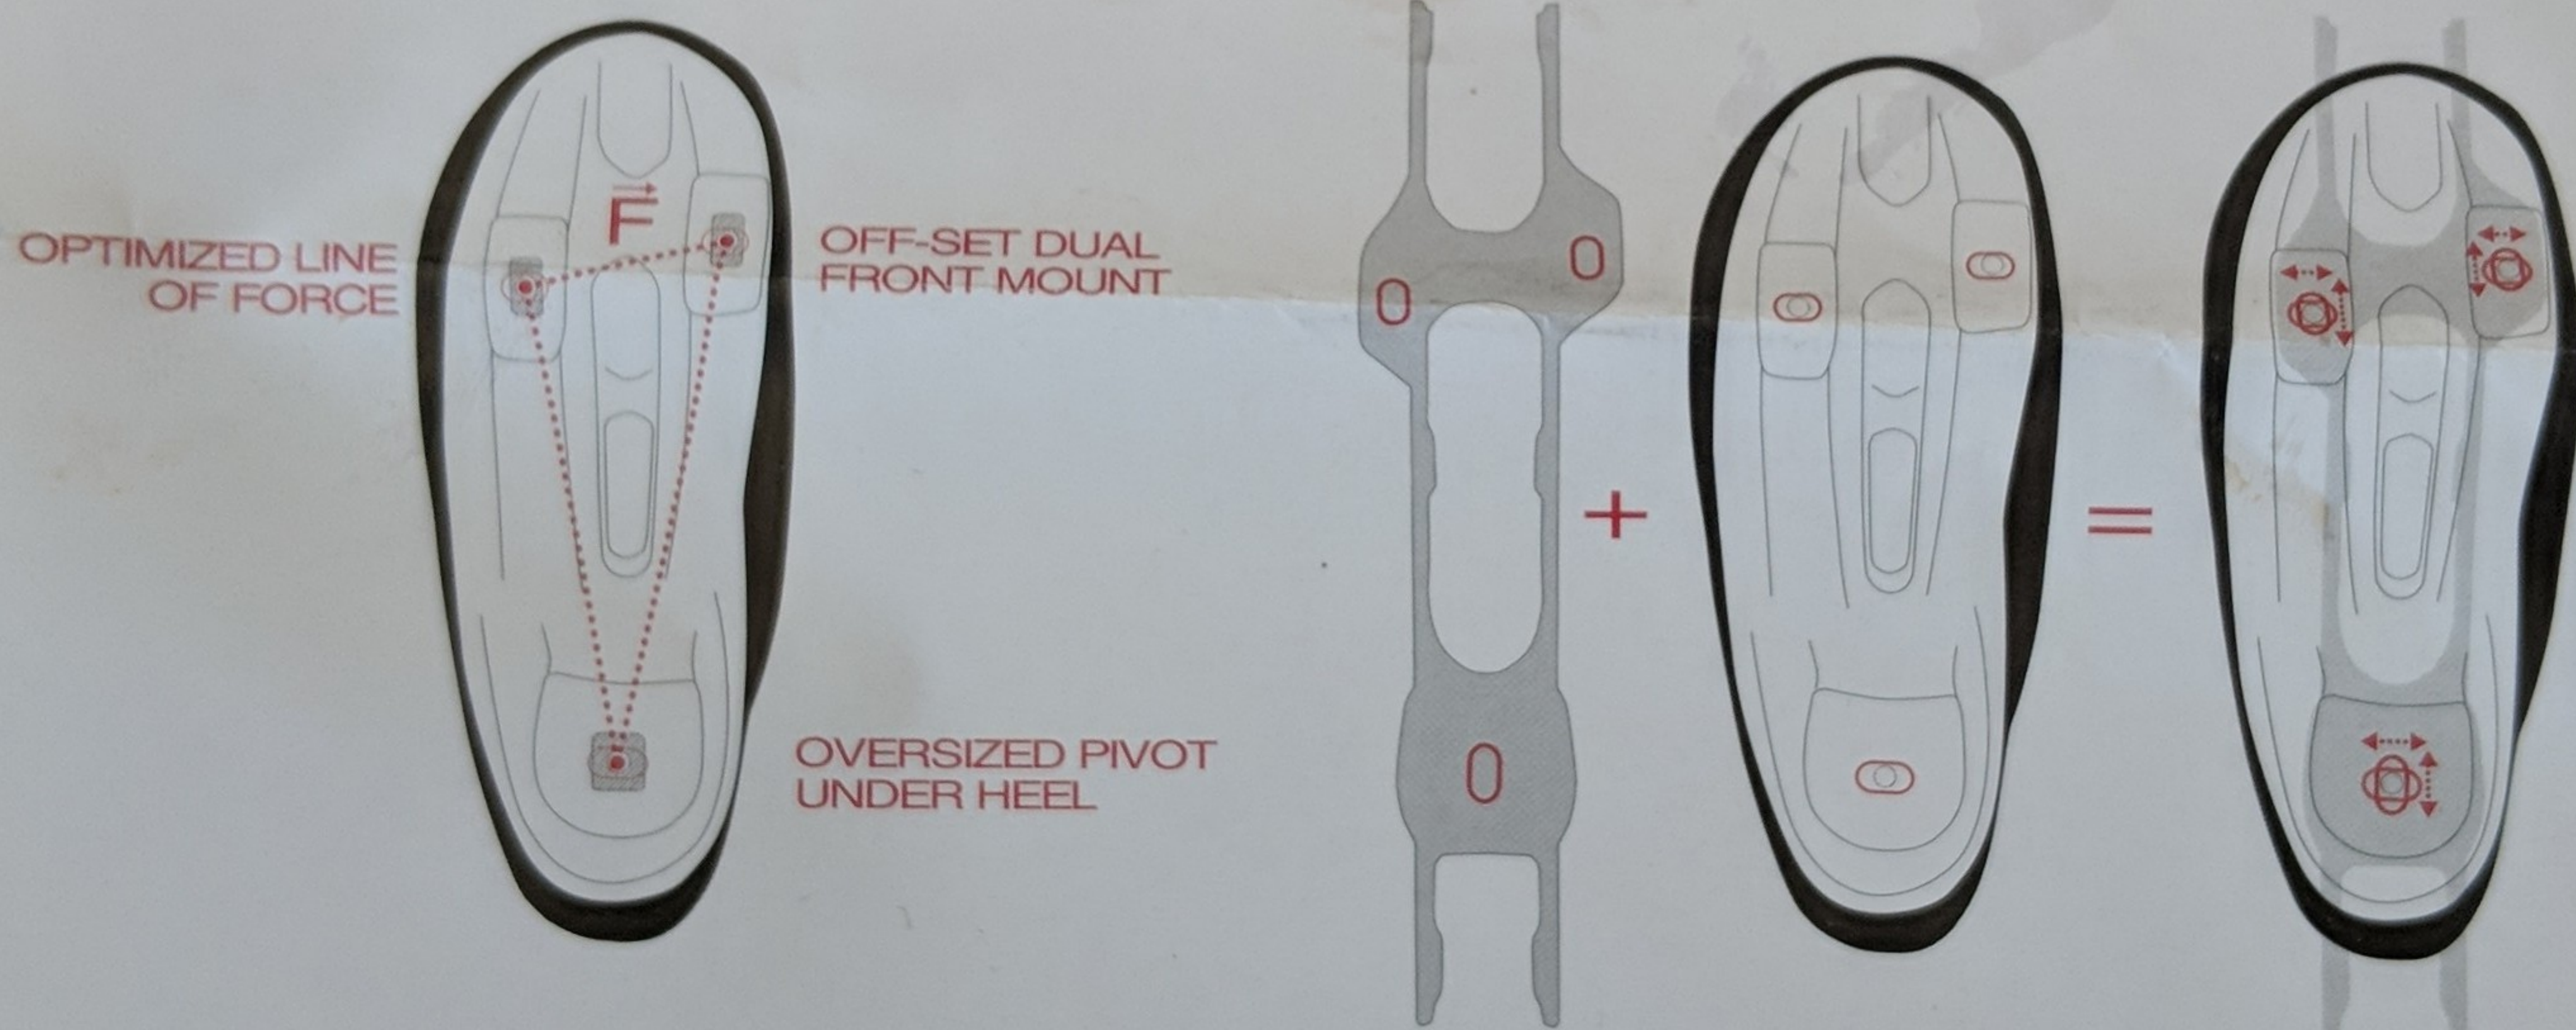

stronger

→ POWERTRIANGLE

customizable X-Slot adjustment
personalizes frame position

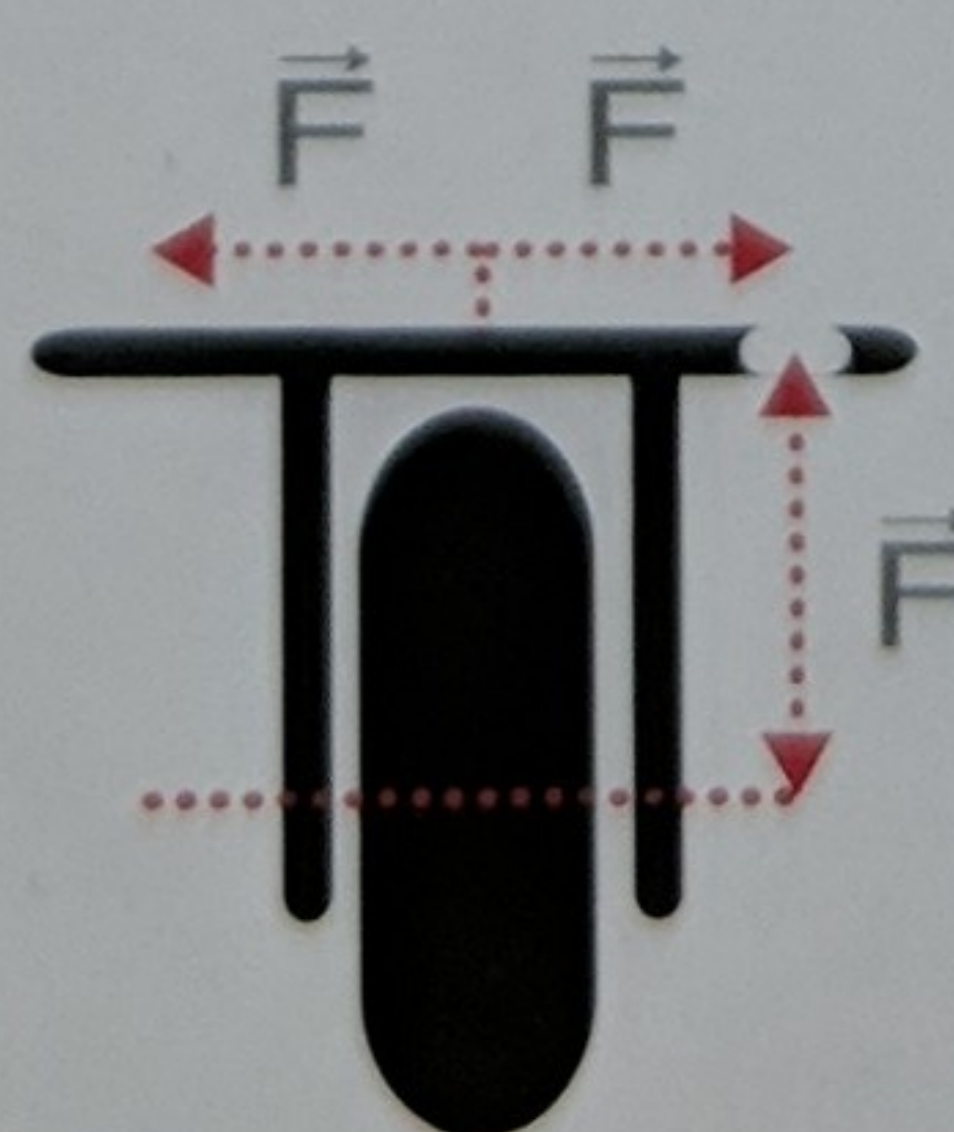

lower for all set ups
4 or 3 wheels

more control & easy skating

fatigue control
→ vibration control

OFF CENTER FORCE &
EDGE CONTROL
